Forecast for Friday 21 Jan 2022

Weather: Contrasting conditions across the ranges, roughly split by the A9, with those in the west seeing overcast and dull conditions. In the east, cloud will be much more broken with spells of sunshine, these lengthy across the Angus and Aberdeenshire Hills. These cloud breaks will gradually fill in through evening, however.

Chance of cloud free mountain/hill tops above 800m: 90% east, 20% west.

Visibility: Extensive cloud above 400-500m roughly west of the A9 bringing widely poor visibility, less than a kilometer for long periods. Cloud will be much more broken and generally above 700m across the Cairngorms with very little across the eastern ranges.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Best conditions to be found across the eastern ranges, away from poor visibility in the west.

Forecast for Saturday 22 Jan 2022
Weather: Another day of poor visibility and spells of rain or drizzle, this focussed west of the A9 with some limited shelter further east, mainly through morning. Mild for the time of year.

Maximum wind: West or Southwest 25-30mph gusting 35-40mph.

Chance of cloud free mountain/hill tops above 800m: 40% east through morning, otherwise almost no chance.

Visibility: Cloud will remain extensive above 400-500m, this leading to widely poor visibility. There is scope for some brightness across the Cairngorms, Angus and Aberdeenshire Hills through morning, but confidence is low for this aspect of the forecast.

Temperature: **Glens:** 6 Celsius rising to 8 or 9 Celsius.
At 800m: Plus 2 or 3 Celsius.
Freezing level: 1200m or above.
